

Maksym Babenko

Senior AI & Automation Engineer

Prague, Czechia | 8+ years in software engineering

mazamaka603@gmail.com | GitHub: mazamaka | LinkedIn | Telegram

I build AI agents, browser automation and the services around them. My work connects models and tools to real workflows, with deep experience in antifraud, browser fingerprinting and Python backends. I work across implementation, deployment, monitoring and maintenance.

SELECTED ENGINEERING WORK

octo-mcp - agent-to-browser integration

MCP server for Octo Browser profiles and browser actions. Async Local and Cloud API clients, Playwright over CDP, bounded rate-limit retries and remote browser configuration.

alpha-scout - collection-to-alert automation

Scheduled multi-source collection, content deduplication, two-stage LLM evaluation, configurable scoring, Telegram alerts and a FastAPI review dashboard.

nodriver-antidetector + **ipqs-checker**

Browser fingerprint customization through CDP, plus an independent backend and browser-extension workflow for IP reputation and device diagnostics.

Claudegate / **LLM Latency**

OpenAI-compatible Claude Code gateway with streaming and tools; regional API measurement, open datasets and MCP access. Network responsiveness and inference latency are measured separately.

AI Website Platform / **MaxBob AI**

Private platform for AI-generated websites, MCP tools, background jobs, previews and deployments. Native Apple voice assistant using SwiftUI, WebRTC and a Python backend.

CORE TOOLKIT

AI: MCP, Claude and OpenAI APIs, tool calling, multi-agent workflows, streaming, Realtime.

Automation: Playwright, Selenium, nodriver, CDP, Octo Browser API, Android/ADB, browser extensions.

Backend: Python, FastAPI, Flask, async SQLAlchemy, PostgreSQL, Redis, Celery, RabbitMQ.

Operations: Docker, Linux, CI/CD, Nginx, Cloudflare, Prometheus/Grafana.

Experience & background

Hands-on engineering, automation and team leadership

PROFESSIONAL EXPERIENCE

Traffic Devils - Python Developer | Nov 2022 - Present

Backend services, administration platforms and AI-powered browser automation. Internal bots and integrations; Docker deployments, CI/CD, centralized logging and monitoring.

Freelance - RPA Python Developer | Jun - Nov 2022

Browser and social-platform automation with Python, Selenium, FastAPI, REST APIs and administration interfaces.

AcidBro - RPA Python Developer / Team Lead | Jan 2021 - Jun 2022

Led an automation team. Browser and mobile workflows, antideetect browser development and server administration; Python, Zennoposter, BAS and Android tooling.

Financial Broker - RPA Developer / Team Lead | Jun 2020 - Jan 2021

Led the automation function, including browser workflows and mobile-proxy infrastructure.

Quora Project - RPA Developer | Sep 2019 - May 2020

Browser automation, Telegram services and mobile-proxy systems.

OnlineReputation - Zennoposter Developer / SysAdmin | Oct 2017 - Aug 2019

Social-platform automation, HTTP workflows and IT infrastructure administration.

EDUCATION

Kyiv National University of Technologies and Design (KNUTD)

Mechatronics & Computer Technologies, 2013 - 2019. Honors.

LANGUAGES & LOCATION

Ukrainian: fluent. Russian: fluent. English: intermediate.
Based in Prague, Czechia. Originally from Kyiv, Ukraine.
